

Planet X

Classified Information

from [PlanetX2003 Website](#)
recovered through [WayBackMachine Website](#)

Insiders from **NASA**, **DoD** national military intelligence, **SETI**, and the **CIA** speculate 2/3 of the population of the planet could perish during the coming pole-shift caused by the passage of **Planet X**. Another 2/3 of those that survive initially could pass away to starvation and exposure to the elements within 6 months. Most every secretive government agency in the USA is fully aware of what is expected and are readying themselves. The **Vatican** is fully abreast of what is expected. The public is not being warned and given their chance to prepare.

The volume of leaks from insiders, observatories, and the Vatican is bursting the dam of this disclosure wide open. The most important story on earth in over 3000 years is fast breaking loose from being held back by the controllers of the financial markets and major media for fear of panic and financial collapse.

These controllers put money in higher regard than people. The public can be given a chance to prepare by being informed. Our planet could very well be about to go through massive regular earth changes once again as soon as 2003 as a result of the passage of our **10th planet** through our immediate solar system.

Many areas are now getting a minor preview of these events now because of the plasmatic electromagnetic connection between the planets. They are experiencing unusual weather, storms, volcanism, and seismic activity.

Planet X orbits between our sun and its dark twin. A diagram from the 1987-1989 NEW ILLUSTRATED SCIENCE & INVENTION ENCYCLOPEDIA in volume 18 under Space Probes shows our dead twin sun & the 10th planet.

Zecharia Sitchin, the world renowned scholar, author of "[The 12th Planet](#)" and archaeologist, does indicate on occasion his knowledge of the return of **Nibiru** "AT THIS TIME"! To be too public about it, would perhaps prove dangerous because of his weight in the scientific community.

Sitchin also states absolutely & openly,
"When Planet X returns, it would remove 90% of currently unsatisfactory human beings from the planet!"

<p style="text-align: center;">Zecharia Sitchin videos on his theory of The 10th Planet Documentary where Zecharia Sitchin shows how life on Earth was affected when an unknown planet hit Earth on the past. (To watch Video click image right)</p> 	 <p style="text-align: center;">Does Planet Nibiru exist?</p>
---	---

A group of scientists in Russia, held several meetings in the year 2000 to discuss the inbound planet, discovered from one of their largest observatories. A 66 year old professor and physicist let it be known that he attended this meeting. This led to the infamous "2003 Problem" from a Reuters news service wire on Sept.13th, 2000. Top Russian government officials called for a commission to study the problem which was said to expect to cause "a string of calamities and a massive population shrinkage." They openly wondered whether Russia would still even exist as a country afterwards.

[Andrei Shukshin](#), who wrote this story, has admitted privately that he did not know why the Russian leaders were saying this and added his own speculation to the new story. All follow-up stories written to quash the disclosure elaborated on Andrei's speculation and left out key points in the original story such as "massive population shrinkage." What we do know is that **Planet X** is inbound now, whether it passes in 2003 is still to be seen. Because of the comets tail drag, this factor keeps varying the speed and thus the time of passage can't be calculated accurately".

Private contact made by a wealthy business man in Germany to a large observatory in St. Petersburg, Russia, yielded significant information. The man in charge of finding new planets at the observatory, admitted they've been watching **Planet X** for 3 years and are worried about the substantial damage it may cause to Earth during its passage. The name they gave for **Planet X** was "**Raja Sun**" or "**Great Star**."

I recently received a call from Canada from a man named Roy who was thanking me after receiving my book. He told me of a call he made to a local observatory on Victoria Island, Canada, where he had a lengthily conversation with an intern to the astronomers. Roy asked if she had heard of **Planet X**. She said "yes," but told him "she wasn't supposed to talk about it and the astronomers there were in disagreement as to whether it would cause substantial damage when it passed." Roy then spoke with one of the astronomers there who said they don't look at objects such as that.

Insiders in **NASA** & the military privately confirm that many of them are quietly contracting out the building of dome-homes (strongest structure known to man) in the upper USA (one of the said safest areas). These domes can withstand hurricane force winds and earthquakes. If these domes are built in the rolling hills or foothills, well away from the shorelines, major population centers, and flat plains (that are expected to flood with the constant rain and melting poles), the chances of survival are as good as you can get.

There are a wide variety of alternatives to dome housing. Some are very inexpensive:

<http://www.rhoades.com/jumplobb.htm>

Trusting the pentagon and the government to guard itself & relay needed information to protect you is clearly illogical. **Planet X is Nibiru, Wormwood, or THE MOST REVERED HEAVENLY BODY IN ALL ANTIQUITY.** After 3660 years on its regular orbit, our 10th planet will pass again. Planet X's effects on Earth, from prior passings, are recorded in ancient texts and in THE SCIENCE OF GEOLOGY & ARCHEOLOGY.

I've uncovered 50 names for Planet X and have 35 of them listed in my book, obtained from a wide variety of sources. "The Destroyer" is the latest name I've uncovered from New Zealand.

"WHAT IS APPROACHING US?"

Father Malachi Martin worked in and around the highest echelons of the Catholic church, had an ear to the pope, and held 3 doctorates. He explained in 1997 that the celestial body approaching us will cause millions to perish during its passage in 5-10 years. He said to look to the skies for a sign of impending doom. The sign will be in the form of a cross and everyone will see it. (**Planet X** is said to look like a red cross in the sky when it first appears)

Also, **Malachi Martin** has read the "Third Secret of Fatima", which he would not talk about it with Art Bell on the air. Art did ask him, "Would millions of people perish?" Malachi replied, "Its worse than that, its worse than you can imagine".

The Vatican actually owns its' own telescope named **VATT** (Vatican Advanced Technology Telescope) which is operated out of the **Mt. Graham Observatory**, located in SE Arizona.

- <http://clavius.as.arizona.edu/vo/vatt.html>
- <http://medusa.as.arizona.edu/graham/graham.html>

The purpose for **Mt. Graham International Observatory** is explained in an interview with Art Bell. The actual time of the clip is April 5th, 1997 at 4:30AM PST. The complete broadcast begins Friday, April 4th, 1997 at 10 PM PST.

<http://www.artbell.com/topics0497.html>

Father **Malachi Martin's** background: Eminent theologian, expert on the Catholic Church, former Jesuit and professor at the Vatican's Pontifical Biblical Institute, is the author of the national best-sellers *Vatican*, *The Final Conclave*, *Hostage to the Devil*, and *The Jesuits*. He was trained in theology at Louvain. There he received his doctorates in Semitic Languages, Archaeology and Oriental History. He subsequently studied at Oxford and at Hebrew University in Jerusalem.

From 1958 to 1964 he served in Rome, where he was a close associate of the renowned Jesuit **Cardinal Augustin Bea** and **Pope John XXIII**. Martin passed away late 1999. Some believe *his death was a result of his open disclosures of the inbound planet* and that the Vatican did not want to reveal that **Wormwood** (Biblical name for Planet X) was also tied to the "Third Secret of Fatima."

I understand that the Catholic church sponsors and engages in scientific studies and not just to prove biblical history.

As of late there's been a rash of observatories that have closed their doors for various reasons or have been destroyed. Many will simply not point their equipment for anyone in the direction of the Orion constellation if they do remain open. Some will give an excuse that there is some sort of obstruction in the way or equipment failure.

All at once, renovations are their favorite excuse. [Griffith Observatory](#) is the latest of a handful of the nation's oldest planetariums to undergo major renovations in recent years. Others include the Adler Planetarium & Astronomy Museum in Chicago and the Hayden Planetarium at the Rose Center for Earth and Space in New York. Coincidental or not, there are other observatories in various countries doing the same thing at this time.

X has INTENTIONALLY BEEN MADE TO SOUND RIDICULOUS and confusing for several reasons. One of which is to avoid causing panic among the world's population.

Many websites and articles continue to be written about **Planet X** that spread lies and disinformation.

1.) They say **Planet X** only MAY exist or there's no evidence for its existence or it comes around only once every few million years if it does exist. This first level of disinformation is widespread.

2.) The second layer of disinformation is for people that have done their homework and absolutely know that **Planet X** does exist. For them, the disinformation artists are saying it will not arrive in our lifetime.

3.) Lastly, for the observatories that are completely aware of **Planet X** and its approximate arrival time, they are saying "keep quiet and don't worry, nothing will happen during the passage."

X's MASS, HIGH-PLASMA-CHARGED MAGNETISM, and DENSITY is such that it **DISRUPTS** the surface of EVERY PLANET IT PASSES. In fact, history shows a few YEARS PRIOR to its passage that its far reaching electromagnetic influence changes Earth's core flows, TRIGGERING MAJOR WEATHER CHANGES.

VOLCANIC and SEISMIC ACTIVITY start to change 3-4 decades prior to each passage. Since 1996 traditional WEATHER has CHANGED DRAMATICALLY, breaking all time records regularly. The up-tick of QUAKES, VOLCANIC INCIDENTS and changes in ELECTROMAGNETICS are being kept out of the media as much as possible.

Weather alone can falsely be blamed on global warming & sun cycles but not earth's rumblings and solar system wide changes at the same time.

99% of the universe is made up of **charged-plasma at the atomic level**. Planets are densely charged plasma spheres. The approach of **Planet X** back into our immediate solar system is sending a tremendous amount of electrically charged plasmatic energy particles in waves to all the planets in our solar system via the filamentary magnetic field lines that criss-cross the universe. [The entire Universe is a connected web of electricity](#) and plasma is the conductor.

The media would have you believe that the pollution of our industrial civilization is the cause of the weather changes or has caused global warming over the last few years. Since all planets in our solar system are experiencing dramatic changes, how can any of this be blamed on our irresponsible actions here Earth. Why do they fail to mention the seismic and volcanic changes occurring simultaneously? Why would ice cores show regular and dramatic changes in Earth's climate from the past? When you understand how our sun and every other planet in our solar system are being effected by **Planet X's** approach, you'll see how ridiculous the media cover-up becomes.

This is the Russian perspective on earth changes. Volcanic and seismic activity have

increased 400-500 percent since 1975. [All planets are changing, Earth is not singled out.](#) Basically, everything in the solar system is experiencing unusual phenomena, increased activity and unusual weather. Hard facts are going unreported by western media. [Dr. Dmitriev's](#) work shows that the planets themselves are changing.

They are undergoing variations in their atmospheres. For example, the **Martian** atmosphere is getting sizably thicker and **Earth's moon** is growing an atmosphere and according to **Dmitriev**, there is a 6,000 kilometer deep layer of Natrium that wasn't there previously. He says that we're having this kind of change in the upper levels of Earth's atmosphere where HO gas is forming that wasn't there before; it simply did not exist in the quantity that it does now. It's not related to global warming and it's not related to CFCs or fluorocarbon emissions or any of that stuff. It's just showing up.

Magnetic fields and brightness of the planets are changing. The planets are experiencing sizable increases in their overall luminosity. **Venus** for example, is showing us marked elevations in its overall brightness. **Jupiter** has such a high energetic charge now that there is actually a visible tube of ionizing radiation that has formed between it and its moon. You can actually see the luminous energy tube in photographs that have been taken recently. In addition, the magnetic field strength of each planet has increased.

Uranus and **Neptune** appear to have had recent pole shifts. When the Voyager 2 space probe flew past Uranus and Neptune, the apparent north and south magnetic poles were sizably offset from where the rotational pole was. In one case, it was 50 degrees off and in the other case the difference was around 40 degrees, both of which are pretty big changes.

The overall changes could essentially be broken down into three categories:

- energy field changes
- luminosity changes
- atmospheric changes

Natural disasters increased 410 percent between 1963 and 1993. This does not take into account the largest increases that have taken place in the last 8-9 years since then! **Dr. Dmitriev** did a very elaborate calculation of natural disasters, to come up with these figures. Even the *Sun's magnetic field* increased by 230 percent since 1901.

So, all in all, what we're seeing is a lot more than just what they call Earth Changes. Very, very few people are aware of the work that is being done in the *Russian National Academy of Sciences* in Siberia, specifically in Novosibirsk, where they are doing this research.

Part of **Dr. Dmitriev's** research shows that the glowing plasma at the edge of our Solar System has recently increased 1000 percent. Higher-charged energy is in turn exciting the plasma and causing more of it to form, so you see more luminosity, more brightness. This energy is then [flowing into the Sun](#), which in turn emits the energy and spreads it out along its equatorial plane, which is called the Ecliptic. All this is happening all at the same time and it's all working up to a crescendo where there is going to be a **sudden shift**.
