

[Galactic Federation of Light](#)

Light Energy: Galactic Federation of Light

Light Conspiracy Theories, such as Galactic Federation of Light, are as much a part of our reality as Dark Side Conspiracy theories and yet in the post 911 conspiracy theory aftermath we can either be honest with ourselves and awaken from the dream, or we can choose to stay asleep and carry on as if our political, religious and educational leaders are telling us the whole truth. It becomes self evident, when we do our own research, that we are being manipulated, with a false reality, that leaves out many facts. These Dark Side Forces have not only left out the facts but in truth they have knowingly led us down a path that keeps us from the truth. Light conspiracy theories have within them the seed to unleash the Forces of Light and release Light Energy on a scale that has heretofore been suppressed by the Dark Side. It is time to unmask the Light Conspiracy Theories and sort through what is theory and what is fact.

“I recently read a great analogy about a baby eagle that fell from its nest and landed in a chicken pen. It grew up thinking it was a chicken scratching all day with the other hens. One day a mighty soaring eagle spotted the bird and swooped down to see what was happening. When it confronted the eagle, with the truth, that it was a mighty, majestic creature made to soar above the earth; the eagle was amazed and could hardly believe what it was being told. All it had to do was look up, flap its wings and soar. When it finally did look up and fly the coop it was amazed at the gift that God had given to him. We too must look up and accept our free gift of flight. We must lift our heads from the limits of the ground and allow our majesty to take flight, soaring above the Tara firma.”
Robert Reckmeyer, Multidimensional Quantum Development, MDQ, Conscious Creator Enterprise, CCE

As we enter the Galactic community we must incorporate our Earth culture with the numerous galactic civilizations that are here wanting-intending, to help us transition to a new understanding and a merging of our creative expressions and our energies. We have only to open our eyes and join the galactic community as new members. Our time has come to graduate to another level of reality and to take on the knowledge and understanding that comes with a clear(er) connection to infinity.

I quote from my book, “The Real Deal, a Transformation of Consciousness, The Enigma of Robert Bruce Reckmeyer”

“Star Fighter School:

I had spent two and one half (2 ½) years getting ready for federal prison, when I was under investigation, and now I was set to experience it in a real way. It would be a part of my daily reality for a very long time. Thankfully I was ready for “Star Fighter School” since I had framed my prison experience in spiritual terms and I would be trained to save the planet from sure destruction in a way that was far removed from “One Joint at a time.”

My first initiation into Star Fighter School would be filled with mental, emotional, physical and spiritual exercises that were designed to build me up and train me for the work ahead and build the strength I would need to overcome my new reality. I had been taught, as a youngster, to be ready for anything and to believe that I was super naturally protected by multi dimensional beings that had power to utilize natural universal laws that most terrestrial human beings were not aware of.

My mother had trained me in the spiritual disciplines and taught me to “reach for the force” and allow God’s source energy to fill me up. I was trained in the “Jedi Knight” school of thought and I always knew deep within my soul that source energy was extremely powerful and able to empower me with an ability to transcend our three dimensional understanding. Now I would be trained in spiritual disciplines of the fourth and fifth dimension. If I could maintain my focus, on my training, and leave my past behind then I could overcome the pain associated with separation and the loss of my freedom. The hard work of educating myself and completing Star Fighter School was dependent on my willingness to sacrifice and grow even when I was hurting deeply by the loss of my freedom and liberty.

I framed my thoughts to be a willing participant in a level of spiritual training that was beyond my human understanding and yet I was able to see through the glass partially. I was on a life changing adventure that had the potential to remake me into a true Jedi Knight and a graduate from Star Fighter School.”

To understand our galactic brothers and sisters we must first reframe our form of reference and understand that much of the experience can only be understood in a metaphysical way. We have to take off our three dimensional (3D) way of looking at things and go within to our light body, connecting with the experience and our multi-

dimensional galactic brothers and sisters on a telepathic level. They are here reaching out to all of us with their love and their intention to connect and inter-act with us.

When I was indicted for running a Continuing Criminal Enterprise, (CCE) statute (21 U.S.C. 848) and facing life in prison without parole, (thankfully I only received a (17) year sentence, serving only (8) years, 'only' is very subjective), I had a choice, either I was going to frame it in a three dimensional perspective or I was going to go within and change the paradigm to a whole new reality. I chose to see it in multi-dimensional terms. I reframed the experience utilizing a higher plane of consciousness and in truth it opened up unlimited possibilities for me. I was no longer locked in a box, in prison, but free to explore a whole new reality. This is exactly what we all must do if we are going to understand our space brothers and sisters, and the way they think.

Our civilization is on the shore looking out over a vast ocean of possibilities. We need only decide if we want to test the water and learn how to swim. There is a quantum shift taking place, on this planet, at this time, and we are free to make up our own minds both individually and collectively. It's either graduation time, or we are held back to repeat another cycle. One is not necessarily right or wrong it just is. We do have our free will choice, in how we move forward, in our consciousness evolution, and it is okay to find the right understanding for each one of us.

Again, I quote from; "The Real Deal, a Transformation in Consciousness, the Enigma of Robert Bruce Reckmeyer"

“Transformation:

Human beings are complex creatures and they go through many stages of experience in their earthly sojourn. If one was to break it down into pieces they would see that it all fits together like a puzzle. When we are in the uterus we are water babies, not breathing air and in a sense from another dimension of reality. We have come from a spiritual reality into the cocoon of our mothers belly and for all practical purposes we are in process of becoming. As we experience the birthing process we face a complete transformation into another reality and experience that which we call life on earth. The process unfolds like a great symphony in that each act follows the other in a great creative process of growth and expansion. As we follow the development of human beings we come to see many people-personalities in one person. We go through the developmental years and grow to adulthood. We are young adults as we spread our wings and cut the umbilical cord from our parents and their control. We go from outside discipline to self discipline and in the process we become someone new. The process from one developmental stage to the next follows us as we grow in our understanding. We go away to school, take a job, get married, have kids and continue through the reality of this life, this earthly sojourn. When we get divorced or experience a loss or a move, we take on another facet to our complex personality development. We are always in a state of transforming ourselves as we walk through this life. Babies, children, young adults, adults, parents, grandparents, and who ever and what ever we might become is our choice. We have the opportunity to transform ourselves many times throughout our lives and many of us choose to do that. Some

comes from free will choice and some just because we grow older and things have a way of happening on their own. What I am speaking to is the times when we choose to transform ourselves and grow, to expand ourselves by the experiences we choose and by the paths we set for ourselves.

When I was a child I spoke as a child and I reasoned as a child. When I was a young adult I broke the umbilical from my parents and took responsibility for my actions and my behavior. When I was a young father I took on another facet of who I was becoming and yet through all of those stages I was an unfinished work. As I grew into my true adulthood and experienced the period of time before prison I learned and grew to understand that there are many dimensions of reality and experience. The creative process is something we do control through our thoughts and our actions. Life is much more than something we just react to and have no control over; we do have control over what is happening to us. We create our own reality and experience by the way we think and the way we frame our thoughts.”

Now is our time to study and hopefully reframe our personal reality to change the way we experience the extra-terrestrial (multi-dimensional) reality of the [phenomena](#). In a sense the off world flying disks we see in our skies are for the most part, only visible to those souls who are ready to see. They are here in great numbers, from many galactic cultures and from many vibratory frequencies. We have some that are negatively aligned and some that are beings of light from the positive polarity. It is for us to open our eyes and choose to connect, both internally and externally. It is not all about connecting on a physical level, rather it must be a connection telepathically and spirit to spirit. The physical contact will come as a result of a greater connection vibrationally. It manifests utilizing the law of sympathetic [physics](#), sympathetic vibrations.

To understand the UFO experience one must be willing to [do their own research](#) and open themselves to the information available in an open source format. The controlled media has been an arm of the National Security apparatus and has manipulated the public, as a form of control, in order to keep us from reaching higher and awakening to our higher self. They have been in fear mode, thinking the population would freak out; on a mass scale if the truth was known. The organized religions of the world would all be called into question, the governments of the world would lose their ability to influence the collective unconscious and so they instituted a policy of disinformation and deniability. This has been in effect since at least 1947 when the Roswell crash took place and alien bodies were recovered from the crash site.

One must go back to the predeluvial epoch in our earth history and research the Atlantian civilization. Michael Tsarion has written a great book, Atlantis, Alien Visitation & Genetic Manipulation. In it he speaks to our ancient human history and the fact that we were created, engineered, by off world intelligent life who mixed some of their DNA with some earth-human DNA and created a new human species of man. Science has confirmed that we took a quantum leap in our evolution, the missing link, and modern man was formed.

Zecharia Sitchin is a scholar who has written a series of books, The Earth Chronicle Series, within them he speaks to our history, spelled out in the Sumerian Texts, unearthed in Nineveh. He has made a lifetime study and is one of the few people in the world who reads the ancient Sumerian language. The fact that our planet was visited by off world civilizations is confirmed through the ancient texts and the wealth of archeological evidence found throughout the world.

In a recent interview with *Zecharia Sitchin*, he discussed his research into the Anunnaki and the planet Nibiru, sometimes referred to as Planet X. Sitchin speaks to a whole history that has been kept from our modern historical narrative, taught to us by the approved educational system. Much of our history has been intentionally kept from us as a means to manipulate our understanding and our conscious awareness. When one thinks outside the box, does their own research, and explores the true Origins and the manipulation of our current civilization one has the beginning realization that there is a lot to learn and many things that were taught in school were blatantly false.

Our human species has a very long history and there is a wealth of knowledge concerning our origins and our genetic manipulation. A very good place to start is reading Zecharia Sitchin and his Earth Chronicles Series, *The 12th Planet*, *The Stairway to Heaven*, *The Wars of Gods and Men*, *The Lost Realms*, *When Time Began*, *Genesis Revisited*, *Divine Encounters* and *The Cosmic Code*. Another great resource is Michael Tsarion and his research into Divination, Astro-Theology, and Ancient History and Genetic Manipulation is some of the best available.

The *Law of One* books were channeled by *Carla Rueckert*, Don Elkins, and Jim McCarty between 1981 and 1984. This material is some of the best channeled material to have come through and is beyond any one person's complete understanding. It can be a lifetime study into meta-physics, frequency dynamics and the multi dimensional universe of which we are a part. I would highly recommend that any serious student of consciousness, galactic civilization and the reality of frequency dynamics and other dimensions takes the time to research their work and the Ra Material that was generated in "The Law of One" series. (See: L/L Research, also See: David Wilcock, Divine Cosmos Web Site, and the Law of One, Study Guide).

Edgar Cayce was another channel who tapped into the "*Akashic Records*," the source from which *Edgar Cayce* received many of his remarkable insights. Also known as the "Book of Life. Edgar Cayce had the uncanny ability to put himself in a trance state and tap into the astral plane connecting his subconscious to the Akashic Records that are a library of knowledge available to the creation. His readings were documented and have been available to all of us through his organization, The Association for Research and Enlightenment, located in Virginia Beach, Virginia. He has always been very close to my heart and someone I was introduced to as a very young boy. He died well before I was born but his trance readings live on and speak to many meta-physical truths, man's search for meaning, knowledge about health and wholeness and our ancient history.

Much of the current channeled material is less than some would find edifying or helpful in their journey to understand the Cosmic Christ Consciousness and our galactic brothers. Many so called channels have a, how do I say, distorted connection, and some is less than true or accurate. What I do suggest can be helpful is to use our own inner knowing, our ability to discern higher spiritual truth and then test it with the information that is being channeled.

Obviously when the material is speaking to high science, vibrational, hyper-dimensional, quantum and the musical frequency reality of the creation it becomes quite clear, early on that there is something special coming through this channel that is beyond our current scientific understanding. Carla Rueckert and the Ra Material, in the Law of One Series is well beyond her science background and jumps out as incredibly helpful to a true seeker. One must always use ones critical thinking skills and tap into their higher self when they are on a journey of discovery. I don't care if it involves political science, a study of UFO's, health, consciousness, quantum-vibrational-plasma-hyper-dimensional physics, or a study of channeled material from other intelligent life in the universe. It comes down to critical thinking skills, meta-physical understanding and where each of us is in our own development. When it resonates one will know to keep going and follow their inner mystical compass; seek and you will find.

Peace

RR
