Preface

- Citizen Soldier

Luke 8:48

Introduction

- Fear vs. Inspiration

Mathew 7:24-27

Chapter One

Secrete Societies

- Illuminati
- Bilderberg
- Free Masons
- Skull & Bones

Chapter Two

Continuing Criminal Enterprise

- Bush Crime Family
- Kennedy Assassination
- Iran Contra
- Illegal Drug Business
- Criminal Fraud/Iraq War
- Articles of Impeachment
- Indictment of George W. Bush, et al

Chapter Three

False Flag

- 9/11
- Patriot Act
- Operation Northwoods
- Physics

- Policy
- Mind Control

Chapter Four

Fascism in America

- Steps to Fascism
- The Patriot Act

Chapter Five

Mind Control

- MK Ultra
- Project Paperclip
- HAARP
- Chemtrails

Chapter Six

New World Order

- United States v UNITED STATES
- National Security Fascist Super State
- North American Union
- Deep Underground Military Bases
- Concentration Camps
- Real ID

Chapter Seven

USA-National Strategy

- Founding Documents
- Education
- Food
- Energy
- Transportation
- Sustainability
- Economy

*This book is dedicated to my Father,
Dr. William John Reckmeyer
By his thoughtful inquiry I am
Inspired to open my heart and
Communicate Truth*

“Help me to be, to think,
to act what is right
because it is right;
make me truthful, honest,
and honorable in all things,
make me intellectually honest
for the sake of right
and honor
and
without thought
of reward to me.”

Robert E. Lee

Preface

Citizen Soldier

Citizen Soldier

Our founding fathers bestowed upon the United States citizen a personal responsibility that transcends our fundamental rights spelled out in our United States Constitution. “We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for common defense, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America”.

The words in our Constitution sets up a system of checks and balances that seek to protect us from those in authority who may from time to time exert power and control in the furtherance of their agenda(s) and objective(s). We are to be eternally vigilant in our responsibility to hold these men and women not only to the words spelled out in this sacred document but also to the spirit contained within it.

Those citizen soldiers, who are the true Patriots of this great nation, must when called upon, stand firm and tall in service to the nation. Service to protect our way of life and our Constitution from those who would do us harm, both foreign and domestic. One must be willing to put personal interests aside and second to the interests of the collective whole.

The time has come for all true Patriot's to say; "it's not okay" and to raise our voices in unison, to hold our public servant's accountable for their unconstitutional, illegal acts. The whole of the United States Government is complicit in these acts, the President of the UNITED STATES, Executive branch, Senate, Congress and Judicial branch of our government. We as a people have been let down by our elected and appointed governmental officials through their action and inaction to uphold their sacred oath of office, to preserve, protect and defend the Constitution of the United States of America. We, as the people and good citizens of this republic must accept our responsibility for this current state of affairs.

One must come to a place in our understanding and reach a point where it becomes self evident that all men are created equal and none are above the law. If we sit back and do nothing, when our public servants subvert the constitution and break the law, then we too become complicit within the context of the law spelled out in our constitution.

Those citizen soldiers that pontificate and do nothing to right this wrong need only go back to sleep and pretend it will fix itself. Power unchecked only leads to more unchecked power and control. Those criminals, who continue in power, can only continue when the citizen chooses to allow them to further their agenda outside of the checks and balances spelled out in our constitution.

The history of liberty and personal freedom is a very short one and must be understood if one is to enjoy the rights contained within our founding documents. This is a great experiment in liberty and justice for all. One must not lose sight of the fact that it is a

relatively short experiment and the forces at work, to disassemble our rights and privileges, as citizens of these United States, are well organized and very powerful. They possess not only financial resources but the full spectrum of tools to crush any and all opposition to their plan.

“We the people”, are all of us, right here and right NOW. We are not historical words on a piece of parchment but rather living, breathing human beings. We must stand up now and say enough is enough, or we fold and allow the dismantling of our sovereign rights as a nation and as sovereign individuals.

It is time to raise our voices and take responsibility back from the few that we entrusted to protect us. They have not lived up to their oath of office and we have not held them accountable for their acts and their failure to meet their responsibility. As long as we fail to take personal and collective responsibility for the situation we now find ourselves we will continue to reap what we sow.

It is not too late to act. We must have the will and the fortitude to see this great land cleansed of those in power who have put their own self interests and their agenda ahead of the common good. We the people must stand tall and take back our great nation from those who have failed to protect us from the subversion of our constitution.

It is time to take legal action to reassert our fundamental rights guaranteed by our constitution. Only a few, in congress, have had the inspirational insight to press for Impeachment, Dennis Kucinich, Ron Paul and a few others. In spite of their leadership the impeachment clause of our constitution has not been utilized due to a lack of true leadership, both Democratic and Republican. In truth the Congress is asleep at the wheel and scared to act. They have put their personal ambition and security ahead of the people's best interest. We as citizens must seek legal recourse, through the courts, and move to hold our public servants accountable for their failure to preserve protect and defend the Constitution of the United States.

The threat from within is far more dangerous than a threat from an outside power. We now find ourselves literally losing our constitution, our way of life, to a group of like minded men and women who think it best to govern from the top down and not from the bottom up. They have an elitist model that dictates a new world order. They have failed to recognize that under our Constitution, they are the people's servants and not our masters.

The Project for a New American Century, PNAC is a document that has spelled out an agenda for full spectrum power and control. It is predicated on the notion that the United States has the right to exert its full power in the pursuit of its perceived interests spelled out by a few men in the name of the whole nation. This policy is being executed in our name without our informed consent. We have allowed these men to take control of our nation and subvert our ideals in the furtherance of their quest for full spectrum power and control. This must come to an end. They are consumed with their own success.

One can get lost in the details. The fact is we must be willing to take a second look and uncover the truth even when it hurts deeply. No one wants to believe the worst and it can be very upsetting when one finds out something terrible is going on. We must grow up as a nation and face the fact that crimes have been committed and the people responsible must be held accountable.

Many years ago when I was a young man, in my early twenties, I took a chance and chose to involve myself in an illegal, marijuana business. I was a very energetic well meaning man and was a risk taker. Science has identified a gene that is handed down from generation to generation that drives some people to take risks that many would choose not to. Many of our founding fathers carried the same gene and chose to involve themselves in the smuggling business. John Hancock was one of these men. Hancock was a successful wine merchant known throughout the colonies as "The Prince of Smugglers." His reputation eventually earned him the honor of being the first to sign the Declaration of Independence. Many smuggled alcohol, tobacco, tea and other taxable goods. They also put their lives on the line in the founding of this great nation risking

their fortunes, their lives, their liberty and their freedom, in their pursuit of freedom and justice for all.

I was investigated for three years, indicted for running a Continuing Criminal Enterprise, CCE 848, and served time in federal prison for my illegal acts. I faced my accusers, I pled guilty to my crimes and I served my time in order that I could enjoy the freedoms this great nation has to offer. I learned the rule of law applies to all citizens regardless of their station in life, color of ones skin, political persuasion or elected position. I learned that we are all created equal and no man is above the law, or so I thought. In truth there are many ideals that we fight for and yet in practice we fall far short of those ideals. We must continue to reach for those ideals or they mean absolutely nothing at all. They are reduced to just words on a piece of paper. If we don't fight for them then we are as bad as the criminals who exert their power and control over us manipulating them for their own gain.

I broke the law as a youth and I paid dearly with the loss of my freedom serving eight years in federal prison. I lost my family, my home and my fortune. I lost time with three young sons and they lost time with their dad. I paid the price demanded of me and I was man enough to own up to my illegal acts and face my accusers. I did not run and hide or corrupt the system to further my own ambition; I owned up to my criminal acts and completed all that was required of me. My debt to society has been paid in full.

How do we hold others accountable for their illegal acts? I would suggest we convene a Grand Jury made up of citizens who hold our constitution sacred and worth every drop of blood that has been shed protecting it from threats both foreign and domestic. There comes a time when men and women must stand up and be counted. Now is one of those times. Our nation must be taken back by the people for the people and do it within the law spelled out in our constitution. We must reinstate the rule of law.

The U.S. Patriot Act, passed after the 9/11 operation, was executed by elements within our government who have an agenda for full power and control both here at home and

throughout the world. They have cloaked this act as a needed measure to protect us from an outside threat. In truth the threat is from within and is the complete subversion of our constitution. When one takes a hard look at the 9/11 operation it has all the elements of a false flag operation and seems all too real. When one studies the Kennedy assassination along side the 9/11 incident and realizes the level of manipulation perpetrated on the American people, both operations utilized the same techniques of trauma based mind control. The perpetrators are masters at manipulating the public and creating a false reality.

It does not matter if you believe the government's conspiracy theory-version of the events on 9/11 or if you are a member of the 9/11 truth movement. Either way they have manipulated the public into believing that the U.S. Patriot Act is legal and enacted to protect us from an outside threat. In truth it has completely trashed Article [IV] of our constitution; "The right of the people to be secure in their persons, houses, papers and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized," and thrown out Habeas Corpus, "The Privilege of Habeas Corpus shall not be suspended, unless when is Cases of Rebellion or Invasion the public Safety may require it".

If the 9/11 event was a false flag operation, to further their agenda for full spectrum power and control, then it should cause all of us to take a second look and hold each elected official accountable for their actions on that fateful day. If they failed to protect us and act then they need to give an account. If they were a part of the operation either as an intelligence agent, military officer, elected official or on any other level then they need to be put under oath to give an account and be brought to justice. If they were a part of the cover up, on any level, then we need to uncover the truth and put all the facts on the table. If it means giving immunity to the lower level people involved, in order to bring the true masterminds and perpetrators to justice then we need to act decisively and bring this national tragedy to a close. We must not fail to act; we must be mature enough to face the truth and come to terms with this national tragedy.

The National Security Act has been in place since 1947. President Truman failed to foresee the damage that would be done, to the nation, in the name of National Security. We now are faced with a government apparatus that hides behind the cloak of secrecy and a false classification to hide its misdeeds. National security is invoked for every misdeed and utilized to hide both real national security issues and those that are kept hidden from the public for criminal purposes.

The Iran Contra/CIA Cocaine/Mena Airport conspiracy was a classic illegal operation that was run from the Reagan White House under the direction of George H.W. Bush when he was Vice President. Ollie North and the operation to trade arms for hostages was only one side of the equation. The big story was the cocaine operation run for the benefit of raising large sums of cash to finance Black/Operations and should be understood in those terms. If we allow our government to utilize the National Security Act, as a cover for their illegal operations against the American people and the people of the world, then we are as guilty as those in authority.

The utilization of the national security act to cover up illegal operations and to keep the public in the dark is an illegal use of the act and those who have perpetrated this system must be uncovered and held accountable. The rule of law is subverted by the use of this act and we must demand that it stop or we allow it to happen. Citizen soldiers must stand together and hold this government accountable from the lowest member to the highest, including the President of the UNITED STATES, the National Security Council, the membership of the Senate and Congress and our Judicial branch of government. No man or woman is above the law, no one.

If we think it right and just to lock up petty criminals and yet we allow the highest governmental officials to get off without having to give an account for their crimes then what kind of a nation are we? I suggest we are a nation of cowards who have failed to live up to our responsibility as citizens of this great republic. We fail not only ourselves but we fail future generations to come.

I come from a family of West Point graduates who have been entrusted with a higher degree of responsibility to protect this great nation from enemies both foreign and domestic. Sometimes we the people are called to step foreword and put aside our own personal interests and seek a higher standard within the context of our collective reality. This is something each person must either face and take corrective action or choose to stay silent, at our collective peril. Major General Albert Stubblebine, Two Star-General, West Point Class of 1952, United States Army, retired, is one such patriot. Dr. Stephen E. Jones, Physicist and Professor of Engineering, BYU, Lt. Col. Robert Bowman, PhD, Director of Advanced Space Programs Development under Presidents Gerald Ford and Jimmy Carter. Lt. Col. Karen Kwiatkowski, A Pentagon eye-witness and a former member of the staff of the Director of the National Security Agency, Michael Chossudovsky, Professor of Economics, University of Ottawa and Paul Craig Roberts, PhD, Assistant Secretary of the Treasury, Reagan Administration are also true patriots. All of these men and women have stepped foreword to address the inconsistencies within the government's version of the events on 9/11. The fact that each man and woman has taken the time to study the 9/11 incident and come to a much different conclusion, than the governments version, is compelling but what is really compelling is the personal price each person has paid in service to their country. They are like many of us; they are directed and led by a higher standard.

They have put their good name and careers on the line in the search for truth. I commend each and every one of us that finds the courage to seek the truth whether it is the 9/11 incident, Iran Contra, the war in Iraqi or any other difficult issue we confront in life.

We are now in a time of revealing. We have within our grasp an understanding that has been long overdue. As we come to the realization that something is terribly wrong and needs to be dealt with we must not lose our balance or our focus. We must press foreword in our search for truth and make the hard choices that need to be made and we must hold our public servants accountable for the current state of affairs.

The Parable of the Sower

People kept coming to Jesus from one town after another and when a great crowd gathered.

Jesus told this parable:

“A man went out to sow his seed.

As he scattered the seed in the field some of it fell along the path where it was stepped on and the birds ate it up.

Some of it fell on rocky ground and when the plants sprouted they dried up because the soil had no moisture.

Some of the seed fell among thorns which grew up with the plants and choked them.

And some seeds fell in good soil; the plants grew and bore grain, one hundred grains each.”

And Jesus concluded:

“Listen, then, if you have ears to hear with.”

Luke 8: 4-8

Introduction

Fear vs. Inspiration

The universal truth, that we are what we think, is made manifest in this day and age especially when we dissect the influence of the media on human consciousness. We are bombarded with a steady stream of informational news that is primarily fear based. Once we stand back and analyze the level of fear based information it becomes quite clear that we live in a fear based reality.

Many are choosing to replace the fear based programming with an inspirational reality that transcends the world we live in. It is a human software program that changes the reality by changing the filter by which we process the experience. This ability to create our own reality is well known and yet it is beyond most people's ability to control. There are too many forces at work trying their best to keep humankind in the dark. It takes an act of the will to overcome the negative programming and seek higher ground.

The age of choice is upon us and it is a choice that is primarily personal in nature. Change the filter and one changes the experience. Choose an inspirational human software program and one sees the light. Choose a fear based human software program and one sees darkness.

One may view it as a light within that is either turned on or it is turned off. If the light is turned off then life seems dark and forbidding. If one views it in cosmic terms it would be as though one were flying through space looking out only to see darkness, cold and separation. On the other hand if one were looking within, at our inner light, we would see our light shining brighter and know we were one with the creative energy of the Universe. Big difference and all we did was change our perspective.

The choice is fundamental to reclaiming our sovereignty and taking back this world from a small elite group that controls the many through fear based programming. They lead the masses through a level of fear that is beyond most people's understanding. Many fear the terrorists, the IRS, police and the credit card companies. Many women fear their husbands or their boyfriends, conversely many men fear their wives or their girlfriends. We grow up in a culture of fear and even those who fail to claim their own fear are brought down when they fear their own mortality. All of us carry some level of fear within our experience both on an individual and a collective basis.

It is time to transcend the fear based programming and choose an inspirational approach. Once we recognize it is a free will choice then it becomes personal and something we do have control over. It also has a physical manifestation. When we are in fear we resonate and vibrate that frequency. Fear causes us to turn off our positive energies. We affect those around us in a negative way. Likewise when we are operating on an inspirational level we resonate a much higher frequency. The higher energies are much faster, love and compassion, grace, forgiveness, abundance. It's like having the lights turned on and draws people into the light. The faster energies heal, they inspire and they attract others of like mind.

The law of attraction works both ways. When we are aligned with the dark energies we are attracted to others of like mind. It works on a vibrational level and many times we don't really know how or why negative experiences come our way. When we align ourselves with the light and the inspirational approach we find people and events seem to

track our higher energies. We meet people who are spiritually advanced and we seem to have experiences that are happy and whole. It really comes down to the fact that we live and have our being in a multi dimensional electromagnetic vibrational universe and we operate within those laws, they are the true laws of creation.

The governments of the world know full well what allows them to maintain their power and control, it is the fear factor. They have become quite skilled in the use and manipulation of fear as an organizing element. The 9/11 incident was a classic example of utilizing fear to control the masses and push through a well organized agenda.

The Patriot Act is a document that is counter to our personal sovereignty and trashes the U.S. Constitution in the name of protecting our way of life. Our way of life is made real because we have a constitution protecting us from those same forces that seek to undermine us. The war on terror is really the war on terra. The Patriot Act is really the Un-Patriot Act or the Traitor Act. The government has turned on its citizens and passed into law and set of acts that do us harm rather than protect us. If we lose our constitutional rights then how does that protect us? The constitution protects us not he other way around.

It is time to organize ourselves in the pursuit of liberty and justice. We must seek a system that is based on an inspirational reality and reject a fear based model. Humankind is at a crossroads in its consciousness development and it is the decision(s) we make that will determine if we as a species ascend to a higher level of consciousness or stay mired in the lower vibrational energy. Once we have a basic understanding of this choice then it becomes an individual responsibility. We can not claim ignorance as a defense.

The first level understanding is quite simplistic, i.e. to be positively aligned or negatively aligned. If one is aligned with the negative polarity then they are choosing power and control through fear. If one is choosing the positive polarity then they are about a inspirational based belief system. Inspiration translates into a respect for the individual as

a creation of the highest order, faith in a Creative energy, faith in mans higher good and faith in a person's individual sovereignty. When we choose inspiration then we understand that love, compassion and individual sovereignty is a fundamental gift from the Creator.

When one has chosen an inspirational based positive polarity, as a human software belief system, then we are pursuing a path to Cosmic Consciousness, i.e. the higher vibrational frequencies. This choice activates our Light Body and will fundamentally change and activate our "junk" DNA. The spiritual masters who have come to enlighten us were teaching us how to activate our light body in order that we might experience a more abundant life.

When we choose to love and share compassion we activate vibrational energy that radiates throughout the universe. The stars, planets and living creatures act as relays to the whole of creation. Our choice to align with an inspirational polarity has enormous consequences for our planet earth, humanity and our Milky Way galaxy, in truth for our whole universe. It is of great interest to all of creation.

The choice to utilize the lower vibrational frequencies, i.e. the "Dark Side", a fear based belief system, which incorporates power and control through fear, is an individual choice but has a collective effect. We know through our current scientific understanding that fear causes human beings to vibrate at a lower frequency. When we allow our consciousness to stay in the lower vibrational frequencies we turn off our light body and fail to ascend to a higher reality. The spiritual Masters were quite clear with their message; have no fear! Fear causes our planet earth to stay "in the dark" and keeps us from ascending to our true spiritual place in the universe. We are not created to be slaves to the lower vibrational frequencies but rather created as a being of light. We can activate our higher strands of DNA which in turn activates our Light Body. Love and compassion makes our light brighter, fear turns our light off.

Leadership is based on two different philosophies, either, one leads through a fear based approach or one leads through an inspirational model. All of us know full well how fear can motivate one to follow someone even if it feels wrong. If we are scared of our spouse or our boss we will follow in lockstep trying our best not to upset them. We may not like it but it does keep one in line and on board. Think about the 9/11 incident. We are bombarded with images and non stop programming that speaks to terrorists coming to do us harm and we are easily led to follow the leader. Bush and Cheney drill it into us to be scared of Weapons of Mass Destruction, a mushroom cloud headed our way, the grid going down or another 9/11 incident. As a result we are programmed on a daily basis to give up our freedoms for safety and security. Obviously if someone wanted to manipulate you, be it a husband, a boss, a criminal, or even a political group that had a criminal agenda, they would only have to keep you scared and you might do almost anything just to keep the peace.

Conversely if one were utilizing an inspirational leadership model they could also organize a lot of followers and motivate many people to their cause. I think about John Kennedy or Martin Luther King. Even now look at the difference in leadership styles between Barack Obama and John McCain. One inspires their following and one tries to scare the public with a war doctrine and tales of woe, if their opponent is elected.

Recently, at the University of Florida, during a student forum question and answer session, a twenty one year old male student asked a question of United States Senator John Kerry. He asked him a question about his involvement with Yale Universities secrete society, Skull & Bones. As John Kerry struggled to answer the question this young student was confronted by two police officers, one male and one female. The female policewoman grabbed the student by the arm and tried to forcibly remove him from the microphone and hall. She and the male police officer could not force him from the microphone so the female officer assumed the crouching position and drew her 9 millimeter hand gun and aimed it at the students head. Consequently the student was surrounded by six police officers and pleading for help was electro shocked with a high powered Taser stun gun, twice.

Some choose to respond to this incident by claiming that it is good when the police responded the way they did. I liken it to Nazi Germany and the fact we both identify with this tactic and would be proud to wear the uniform in 1939 Berlin or we reject it. I believe it is a fundamental choice. Either we are aligned with the light and the Cosmic Christ consciousness or we align with the Dark Side. If we think it is acceptable to utilize this kind of power and control, through fear, then we are sending the message that we agree with the utilization of dark side forces, black magic. We are ascribing to a fear based belief system that incorporates the negative polarity and as such we are not choosing to be counted with the forces of light.

Human beings need to be free to ask the hard questions of their government officials especially when a student forum is organized for that purpose. Whether it be in the White House press room or during a student forum, Watergate, Iran Contra-CIA Cocaine, Chemtrails, the truth about 9/11 or the lies about Weapons of Mass Destruction and the War in Iraq, we need to allow the truth to come out. To try and exert power and control through fear is unacceptable and has no place if we are a follower of higher energies. It is the opposite of inspiration. Fear is completely unacceptable as a means for control.

Nazi Fascism is as real in this age as it was in the 1930's. It might have a sugar coated expression, now, but it is fascism nonetheless. We are living through a historical time line that is best summarized with the phrase "The War on Terror" The war on terror is a human belief system. If one ascribes to a fear based reality then they are part of the problem not part of the solution.

I am concerned about the nature of our personal and collective reality. I don't doubt that we are here, in this age for good reason. My spirit cries out with compassion, for all of us, so we might individually and collectively experience the wonder of waking up. Consciousness is quickened when we understand the truth of vibrational physics and the reality of our belief system. Personally I want to graduate to the next level and I know many understand deep within their spirit that inspiration far out trumps fear.

Let us meditate upon this incident and not take the elitist position that falsely thinks, instilling fear in the population is an acceptable way to maintain control. Human beings are created free and our sovereignty is fundamental to who we are as a species. If the elite expect to maintain their control through fear then let's stand up and reject their model choosing inspiration instead.

Our role as citizens is to pose the question: Are we a follower of the inspirational model, the light and aligned with the positive polarity or are we aligned with the Dark Side, utilizing power and control through fear. The police scared many of those young students at the University of Florida when they electro-shocked that young man. The government, under the guise of The New World Order, is trying to control the human family through fear and the War on Terror. As President George Bush stated; we are either with them or against them. I for one stand up and choose to be inspirational based, love and compassion, light body activation, aligned with the Cosmic Christ Consciousness. I reject a fear based system, may I suggest you do too.

The Two House Builders

“So then, everyone who hears these words of mine and obeys them will be like a wise man who built his house on a rock.

The rain poured down, the rivers flooded over, and the winds blew hard against the house. But it did not fall, because it had been built on a rock.

But everyone who hears these words of mine and does not obey them will be like a foolish man who built his house on sand.

The rain poured down, the rivers flooded over, the winds blew hard against that house, and it fell.
What a terrible fall that was.”

Mathew 7: 24-27
